Mr. D. C. Corkill
Georgia Pacific Corporation
P.O. Box 68
Sigurd, UT 84657

Dear Mr. Corkill:

Re: Permit Application Update: Gypsum Quarries, ACT/041/009,
DOE/041/003, DOE/039/006, Sevier and Sanpete Counties, Utah

After speaking with you last Wednesday I did a quick review of your files and the submitted mine and reclamation plan. I apologize for not doing this before calling you, but I was not expecting you to say that you were still happy with your 1977 permit application. In any case, before we can conduct an initial review and a site inspection, we will need the following information:

1. An update of Exhibit B, Drg. D-46-M-296, showing the entire permit area. This map should include the Western #40 and #41 claims (currently under DOE/041/003). The G.P. #1 - #5 claims (DOE/039/006) near Mayfield should also be included as part of the permit area and submitted on a separate map.
2. An update of exhibits C-H plus new exhibits for the two DOE's. These plans should delineate the following:
 - a. Areas mined out prior to May, 1975 and which have not been used since that time. You will not be held responsible for reclaiming these areas.
 - b. Areas disturbed from May, 1975 to the present. Please show the locations of the mined areas, spoil piles, topsoil stockpiles, roads, pads, buildings, etc.
 - c. Areas reclaimed.
 - d. Areas that you plan to mine in the future. (preferably in 5 year projected increments)

3. A summary of your reclamation results to date (i.e., methods employed, seed mixes used, and revegetation success obtained).

As I may have mentioned on the phone, it is important that you keep the amount of unreclaimed land to a minimum so that your reclamation bond will not be excessive. I have included a copy of a memorandum explaining the different types of reclamation bonds that can be used and a self bonding qualification sheet. The reclamation bond will have to be posted when your application is tentatively approved.

I have also included a copy of the Mined Land Reclamation Act and the current permit application form (MR-1) that we use. This is for your general information and does not have to be completed. I have not included an Annual Report Form since the plan updates requested will provide us with the necessary information.

Please, if possible, provide us with the updated information before June 1, 1987. When we receive the update, we will review the plan in detail and arrange a site inspection with you. Please contact me if you have any questions or need additional information.

Sincerely,

Frank J. Filas, Engineer
